

LEADERS' NOTES: HOW TO MAKE A STOMP ROCKET ©www.johnhemmingclark.com

Additional Equipment and Materials: Sticky tape; scissors; colouring pens (optional)

- Decorate in the right-hand rectangle (the rest will be hidden!), the fins (both sides) and part of the cone.
- Cut out rectangle (thick line), circle and three fins.
- Roll the rectangle loosely around the launch pipe starting with X side, tape along the long edge of the tube you've just made and remove from pipe.
- Put tape over the top of the tube (don't pinch) making sure you have an airtight seal. (Blow from other end to check). You will need 3 or 4 pieces of tape.
- Cut along dotted line to the centre of the circle, bring the two sides that you have just made under each other to make a cone that is the same diameter as the tube then tape along the edge. Tape the bottom of the cone to the top of the tube where the sticky tape seal is.
- Fold along dotted lines then tape the fins either side to the bottom of the tube.
- Insert the rocket over the pipe and you're ready to go!

HOW TO MAKE A STOMP ROCKET TEMPLATE & INSTRUCTIONS ©www.johnhemmingclark.com

Additional Equipment and Materials: Template; sticky tape; scissors; colouring pens (optional)

- Decorate in the right-hand rectangle (the rest will be hidden!), the fins (both sides) and part of the cone.
- Cut out rectangle (thick line), circle and three fins.
- Roll the rectangle loosely around the launch pipe starting with X side, tape along the long edge of the tube you've just made and remove from pipe.
- Put tape over the top of the tube (don't pinch) making sure you have an airtight seal. (Blow from other end to check). You will need 3 or 4 pieces of tape.
- Cut along dotted line to the centre of the circle, bring the two sides that you have just made under each other to make a cone that is the same diameter as the tube then tape along the edge. Tape the bottom of the cone to the top of the tube where the sticky tape seal is.
